‘God created the perfection of Life in the
imperfection of Man, in order to reveal love for
the world, at the cross.’

Kiki en Christ

INTRODUCTION

O READERS who thirsts for truth, meaning and spirituality, I invite you to plunge once again with me into the unfathomable depths of Divinity. In this book, we will explore the mysteries and wonders of God, that intangible, elusive being who has fascinated, inspired and astonished people for millennia. Who is God? What role does He play in the universe and in our lives? How can we understand and communicate with him? These are just some questions we'll be answering in this

page, by drawing our inspiration from the sacred texts of the Bible and letting the Holy Spirit guide us in understanding them.

Dear reader, in this book I will try to give complete answers to the question of the nature of God. Although it's impossible to comprehend the infinite with our finite, limited, and imperfect minds, the Holy Spirit will give us the answers we have been waiting for to define God.

In this book, then, we will approach God from the perspective of Christianity, trying to get to Him through His manifestations and attributes. We'll talk about His goodness, justice, mercy, power, wisdom, love, and many other attributes.

So, in this first chapter, we'll introduce the dogma of the Trinity and define it in terms of Christian theology. Next, we'll discuss the theological debates surrounding the formulation of the dogma, as well as Arianism.

In the following chapters, we'll present GOD in all His manifestations...

Finally, we will summarise the arguments presented in the various chapters and offer suggestions for a better understanding of the nature of GOD.

Chapter 1 : I and the Father are One

THE TRINITY

THE Trinity is one of the most fundamental concepts of Christian theology.

According to this concept, God exists in three equal, distinct, and consubstantial persons: the Father, the Son, and the Holy Spirit. However, there have been debates and controversies about this doctrine over the centuries, especially with Arianism, which held that the Son was not equal to the

Father and that his divinity was secondary. In this book, I am challenging the dogma of the Trinity and Arianism because I don't believe it is consistent with God's words as described in the Bible. By proposing an account of God that is closer to the Bible.

This book is intended to encourage the reader to think critically about the concepts of the Trinity and Arianism, and to come closer to the vision of God as described in the Bible.

The concept of the Trinity is deeply rooted in Christian history and theology, and is considered an essential foundation of the Christian faith. However, as mentioned above, there have been debates and controversies around this doctrine,

and I question its validity in light of the biblical interpretation given by the Holy Spirit.

The new picture of God that I present in this book will invite readers to rethink their picture and understanding of GOD and to explore the possibility of an alternative vision of GOD that is captured in the vision of the Trinity.

This book raises important questions about the nature of God, how we understand Him, and how we interpret biblical teachings.

The book encourages readers to engage in critical reflection and to deepen their personal understanding of the Christian faith.

Ultimately, this is a thought-provoking book that invites readers to explore new perspectives on one of the most central concepts in Christian theology.

As you may have guessed, my vision of GOD runs counter to the traditional teachings of the Christian Church. This vision is based on a personal interpretation of the Bible and challenges the teachings of the Church Fathers.

The book therefore encourages readers to question the beliefs they may have acquired over the years and to seek a personal understanding of God through the Holy Spirit.

However, this questioning of the doctrine of the Trinity is likely to provoke negative reactions

from churches and religious groups that consider this doctrine essential to their faith.

Some may accuse me of heresy and call for excommunication. This just goes to show how sensitive debates about the Trinity are and how polarising they can still be.

Ultimately, this book offers an interesting perspective on a fundamental concept of Christian theology and encourages readers to deepen their understanding of God and their faith.

Whether you agree or disagree with the ideas presented, this book invites open and honest dialogue about the nature of the Godhead and the Christian faith.

The doctrine of the Trinity, as understood and taught by many Christians, is the result of a theological development that took place many centuries after the events described in the Bible.

The Trinity is the result of a particular interpretation of certain passages in the Bible.

God is unique and indivisible, but exists in two distinct persons, the Father and the Son.

The Holy Spirit is an expression of God's Spirit, but is not a separate person.

Although this interpretation may seem radical to some, I invite readers to examine it carefully in the company of the Holy Spirit through the Bible and

to compare it with their own understanding of Scripture.

It is my hope that readers will come away from this book with a deeper relationship with God and a clearer understanding of the nature of His divinity.

The Trinity is a doctrine developed by early Christian thinkers rather than a direct teaching of Jesus or the apostles.

The apostles of the Bible taught the unity of God, while the doctrine of the Trinity was developed to resolve the theological difficulties that arose in the early Church.

By challenging the doctrine of the Trinity, I am also challenging the authority of the Roman Catholic Church and the Orthodox Churches, both of which have adopted this doctrine as an integral part of their theological teaching.

This may be seen as a major challenge to the authority of established religious institutions, but TRUTH must not be hidden under a bushel.

Matthew 5:14 'Ye are the light of the world. A city that is set on an hill cannot be hid.

15 Neither do men light a candle, and put it under a bushel, but on a candlestick; and it giveth light unto all that are in the house.'

Ultimately, this book will invite you to examine your own beliefs and to think critically about the

teachings of the Church. It raises important questions about the nature of God, the way we interpret biblical teachings, and the way religious teachings are developed and transmitted.

Whether one agrees or disagrees with the ideas presented in this book, it is sure to provoke thought and encourage further exploration of Christian doctrine.

The concept of the Trinity divides religious opinions and beliefs. By definition, a person is an individual endowed with will and conscience, character traits and thoughts, and free will.

This definition applies to God the Father and His Son Jesus Christ, but not to the Holy Spirit.
